Education

- 2023 – 2026 **Bachelor's Degree in Computer Science**, *Higher Institute of Information and Communication Technologies (ISTIC)*, Borj Cedria, Tunisia, Major: Software Engineering and Information Systems
Key coursework: Algorithms and Data Structures, Relational Databases, Software Engineering
- June 2023 **Baccalaureate in Computer Science**, *High School*, Manouba, Tunisia

Professional Experience

- January 2026 – May 2026 **Final-Year Internship**, *EXCELLIA Solutions*
- Built a financial transaction monitoring and AML detection platform.
 - Designed and implemented a DMN-based rules engine (Camunda) for transaction risk scoring.
 - Integrated a Python/BERT microservice for Politically Exposed Person (PEP) detection via semantic similarity.
 - Set up a modular architecture with Spring Security (JWT), PostgreSQL, and Angular; wrote technical documentation and UML diagrams to track architecture decisions.
- July 2025 – August 2025 **Backend Development Internship**, *Flouci*
- Backend development with Django within a microservices architecture.
 - Collaborated with the team on feature implementation and technical troubleshooting in a real production environment.

Personal Projects

- Nov – Dec 2025 **ChicBot**
- Multilingual e-commerce chatbot: intent classification (DistilBERT) to route user queries and drive personalized recommendations.
 - FastAPI (Python) backend exposing the NLP models via REST API, with multi-turn conversational context handling.
 - Real-time translation for a seamless multilingual user experience.
- Oct 2025 **Cloud Resume Challenge**
- Serverless resume site: static frontend hosted on S3 behind CloudFront (CDN, HTTPS) for minimal latency.
 - Persistent visitor counter: Lambda function incrementing a DynamoDB counter, exposed via API Gateway (REST).
 - CI/CD pipeline via GitHub Actions for a fully automated deployment. yassineresume.dev
- Aug – Sept 2025 **Video Summary — Full-Stack AI Application**
- Django REST backend: asynchronous processing (Celery/Redis) for audio extraction and transcription.
 - Integrated the Groq API (LLM) to automatically generate a video summary from the transcript.
 - Angular frontend: JWT authentication and real-time processing progress updates via Server-Sent Events (SSE).

Skills

Languages	Java, Python, SQL, JavaScript/TypeScript
Development	Spring Boot, Django, Angular, React, Flutter, REST APIs, Microservices
Cloud & DevOps	AWS, Azure, Docker, CI/CD, GitHub Actions
AI & GenAI	LLM integration, NLP (BERT/DistilBERT), AI coding agents
Databases & Tools	PostgreSQL, Git, Camunda (BPMN/DMN)

Languages

Languages Arabic (native), French (TCF TP B2), English (IELTS 6.5)
